

SHIVA REZVANI

Senior Product Designer | Research-led Product Design

Tehran, Iran | +98 936 905 0664 | shiva.rezvaniiii@gmail.com | shivarezvani.github.io | LinkedIn

SUMMARY

Senior Product Designer with 8 years in design, including 6 in fintech. Joined Daran as one of its first designers and stayed through its acquisition into Azki Sarmayeh, helping evolve a single-fund product into a multi-service investment platform. I own research, information architecture, user flows, UX writing, and post-launch analysis for regulated financial products, translating evidence into shippable decisions across business, banking, and technical constraints.

EXPERIENCE

Senior Product Designer - Azki Sarmayeh

Jun 2023 - Jul 2026

Fintech and investment platform | Tehran

- Across the Daran-to-Azki period, registered-user-to-investor conversion increased from approximately 1-2% to 7-8%; led research and redesign work across investment discovery, information comprehension, and first-investment journeys during this evolution.
- Led product design as the platform expanded from one fixed-income fund to 11 funds across six service lines, creating coherent discovery and transaction patterns for funds, precious-metals trading, crowdfunding, and lending.
- Shipped three lending products through Blu Bank and AzkiVam: a BNPL integration, gold-purchase financing, and a gold-backed loan spanning two organisations in one user journey.
- Ran mixed-method research for the multi-fund experience, including moderated usability testing and a three-cohort survey (5,000 invited, 215 responses); translated findings into 11 screen-level proposals, with three shipped directly.
- Restructured the UI kit into a Chakra-aligned design system with semantic tokens, accessible colour roles, WCAG AA contrast, and implementation-ready component variants; later led the post-acquisition migration to the Azki brand.

UI/UX Designer - Daran (acquired by Azki)

Sep 2020 - Jun 2023

Investment fintech startup | Tehran

- Worked directly with the founding team as one of the first designers, shaping the brand identity, information architecture, and first shipped versions.
- Designed the early financial-education product while investment licences were pending; its content taxonomy later informed the platform's service architecture.
- Designed a choice-based risk assessment, directional profiles, goal projection, and suggested portfolio as the first step toward a planned robo-advisory product.
- Designed the company's first regulated investment experience (a fixed-income fund) and the in-app human-advisor booking service.

Product Designer - Independent

Dec 2018 - Sep 2020

Industrial and product design projects | Tehran

- Delivered industrial and product design projects for a range of clients, including concept sketching, card modelling, and 3D modelling in Rhino.

Visual Merchandiser - Dorsa Official

Jul 2018 - Nov 2018

Luxury retail | Tehran

- Designed window and in-store displays, signage, and store floor plans for retail environments.

CAPABILITIES & TOOLS

Product design: Product discovery, information architecture, complex journeys, wireframing, prototyping, UX writing, design QA, and developer handoff

Research and analytics: Interviews, surveys, moderated usability testing, synthesis, Google Analytics, and Microsoft Clarity

Design systems: Figma component libraries, semantic design tokens, accessibility, WCAG AA contrast, and Chakra alignment

Domain: Investment funds, lending and BNPL, precious-metals trading, crowdfunding, and partner-bank integrations | Tools:

Figma, GA4, Clarity, Jira, Porsline, Photoshop

EDUCATION, COURSES & LANGUAGES

M.A., Industrial and Product Design - Islamic Azad University, Central Tehran | 2018-2020

B.A., Industrial and Product Design - Islamic Azad University, Central Tehran | 2012-2017

Courses: UX Research - Amanj Academy | UI/UX Design - Inverse School

Languages: Persian (native), English (intermediate)
